Re: Don't do anything to damage Galveston Bay

Dear Mr. Miller:

I am writing to let you know that I support a permanent cap for the San Jacinto River Waste Pits. The best remedy for everyone is to make the current cap on the waste pits a permanent one—this has been identified as Alternative 3. The current cap has never leaked since its installation in 2011.

Other alternatives under the EPA's consideration pose too much risk for those of us living outside the immediate area of the Superfund site. Any alternative other than Alternative 3 exposes the entire bay area to unwarranted risks.

I support making the current cap a permanent one because it is supported by science and is in the best interests of the entire community.

Sincerely,

(b) (6)
